- 24/7 Attentive Service

High-quality Steel Panel

Our gable plate comprises 4 mm / 0.16" thick steel panel, which is more durable, corrosion-resistant, and prolongs its service life.

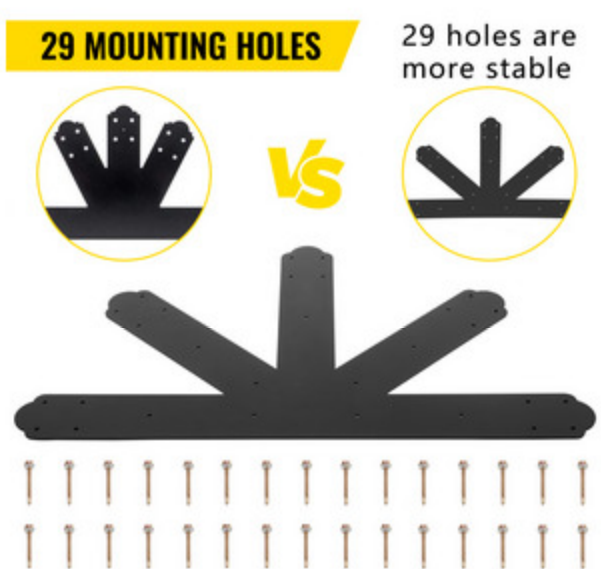

Professional Surface Processing

We use special outdoor powder 100-120 microns to enhance the corrosion resistance ability to adapt to the harsh external environment.

Effortless to Install

It is easy to assemble and can be used when fixed in the mounting hole with screws. Gable plates can be used for various indoor or outdoor projects.

29 Mounting Holes

Compared with other products, we have 29 mounting holes to make the structure stronger and increase safety. In addition to the main truss connector plate, we also include 30 bolts for easy installation.

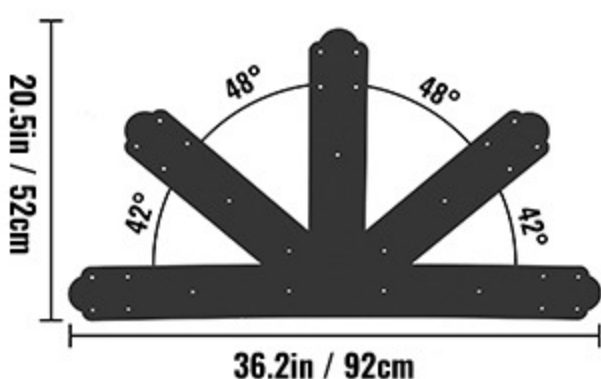

Stylish Look

The product's appearance design is stylish and straightforward, and the decorative steel bracket provides steady for the connection between the entire room beam, making it completely fit for your space.

Wide Application

While strengthening your house structure, it also increases the value of your house. It is very suitable for outdoor projects such as pergola and timber framing cover.
