BE365F

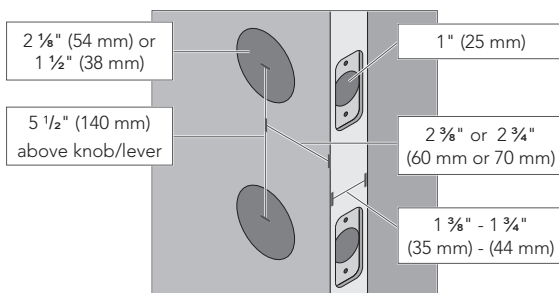

UL screw

IMPORTANT NOTES

- For BE365F and BE365F20, see **Additional UL steps (Not common)** before beginning. (Not common)
- DO NOT use a power drill for installation!
- Use a screwdriver to remove product from packaging.
- Install and test lock with door open to avoid being locked out.
- Pay special attention to step 3. If lock is installed with the cam in the wrong position, the lock will not function properly!

1 Check door preparation.

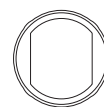

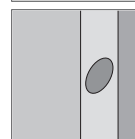

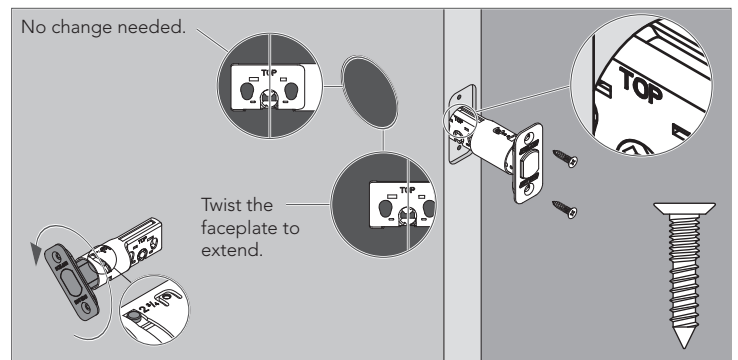

If dimensions do not match, you may need to modify your door.

alle.co/be365prep

2 Install the bolt.

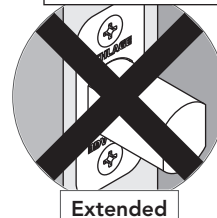

Adjust bolt as necessary.

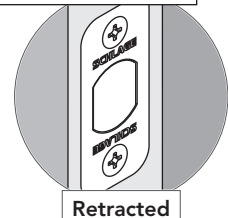

No mortise? See **Change faceplate**

CAUTION

Bolt must remain retracted throughout installation!

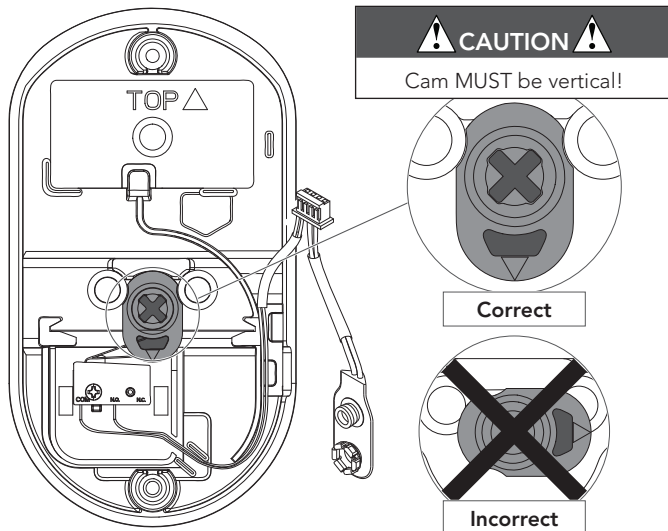

Extended

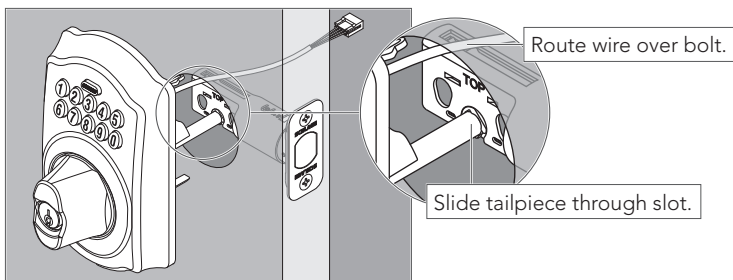

Retracted

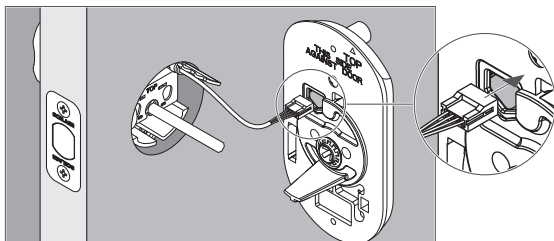

3 Rotate baseplate cam to correct position.

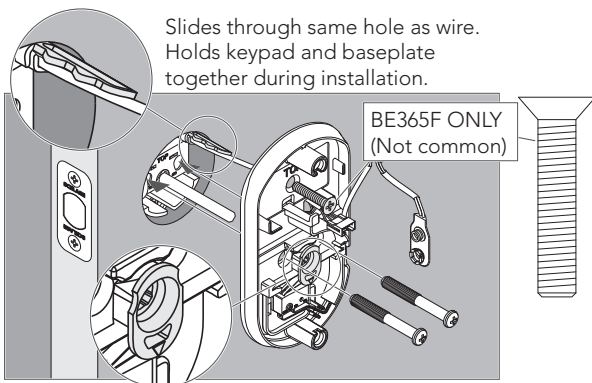

4 Install keypad.

5 Route wire through hole in baseplate.

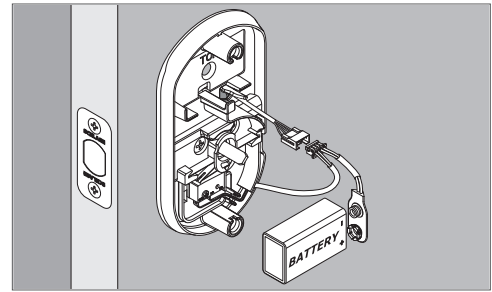

6 Install baseplate.

Cam MUST be vertical!
Review step 3!

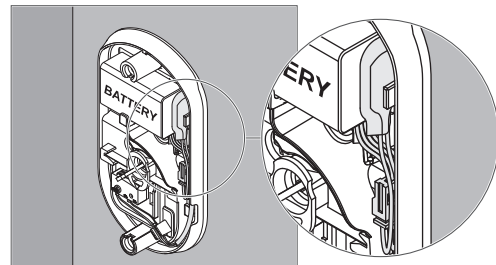

7 Connect wire and 9V battery.

Lock will beep when battery is connected.

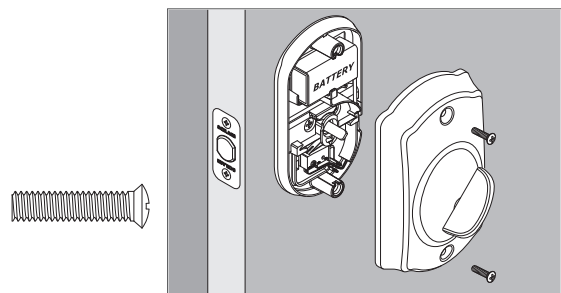

8 Place battery in holder and tuck wires.

Any wire routing is acceptable as long as wires will not be pinched by cover.

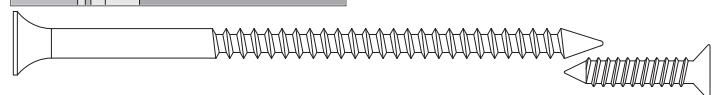

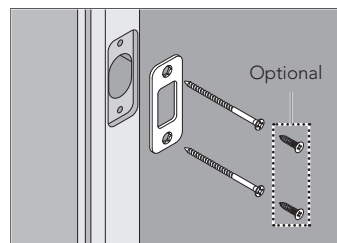

9 Install cover.

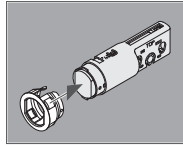

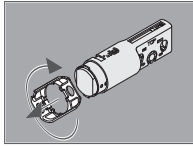

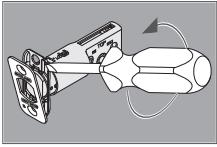

10 Install the strike.

Hole must be at least 1 1/4" (32 mm) deep.

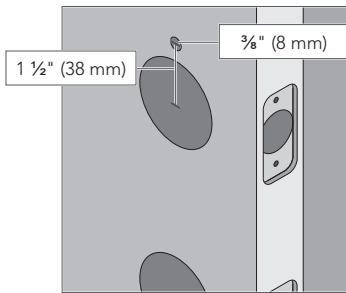

Change faceplate

1. Remove faceplate.
2. Remove backplate.
3. Install drive-in faceplate.

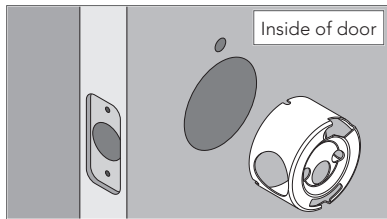

Additional UL steps (Not common)

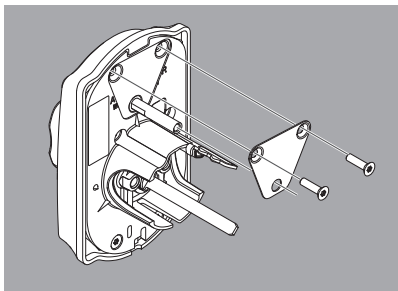

a BE365F ONLY: Prepare additional hole.

b BE365F AND BE365F20: Install UL cup.

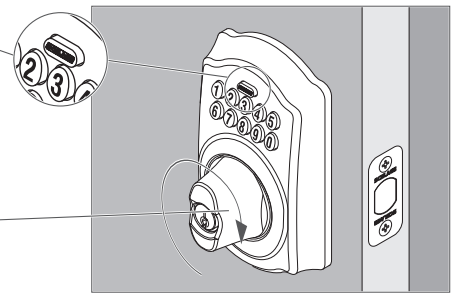

c BE365F ONLY: Install UL plate

Test lock

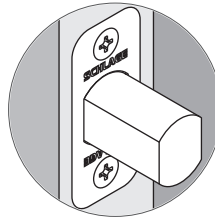

a Lock (extend bolt).

1. Press the Schlage button.

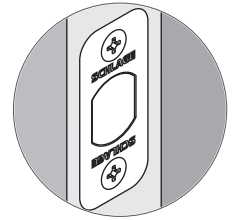

2. Rotate thumbturn towards door edge.

Did bolt extend?

Yes. Lock is installed correctly.

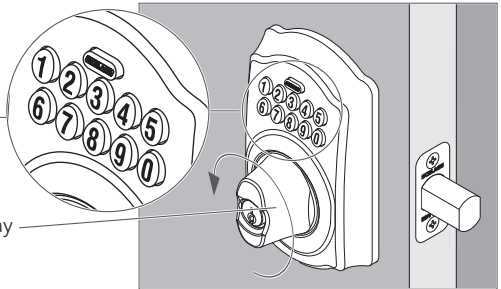

No. Lock is not installed correctly. Remove lock and reinstall. Pay close attention to cam position in 3.

For troubleshooting information, go to schlage.com/faqs-keypad.

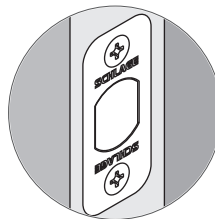

b Unlock (retract bolt).

1. Find User Code A on the label located on these instructions.
2. Enter User Code A (four digits) into the keypad.

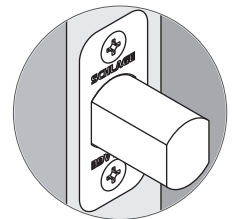

3. Rotate thumbturn away from door edge.

Did bolt retract?

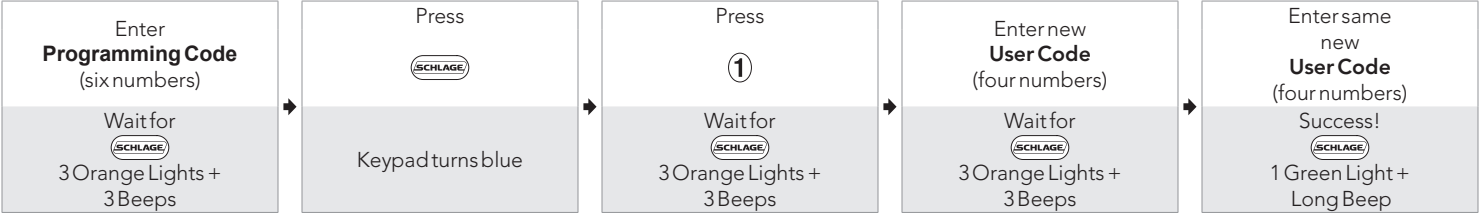

Yes. Lock is installed correctly.

No. Lock is not installed correctly. Remove lock and reinstall. Pay close attention to cam position in 3.

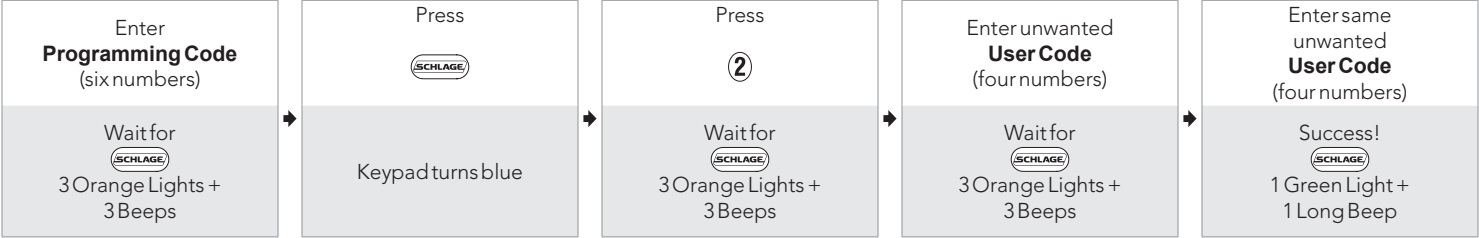

Quick Programming Reference

Adding User Codes*

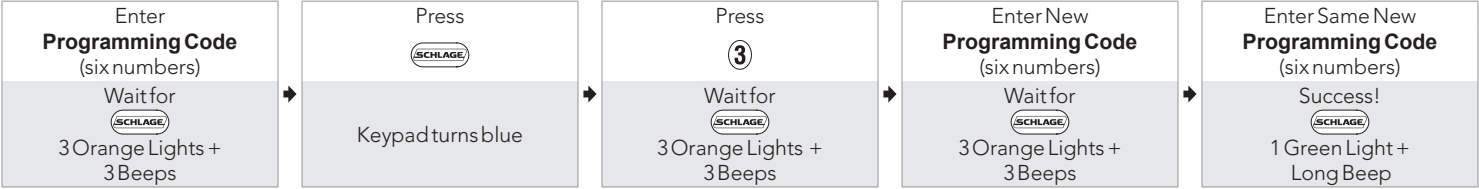

* These four numbers must be different from the first four numbers of the programming code.

Deleting User Codes

Changing the Programming Code*

* The first four numbers must be different from all of the User Codes currently in the lock.
