## Plug-in Heat Pump with HydroBoost Water Heater Installation Guidelines to Provide Optimal Efficiency

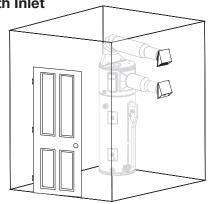

**Heater: Ducted With Inlet** or Outlet Duct Room size: Any size room Requirements: Air gap under door equal to 18 in<sup>2</sup> (0.75" clearance)

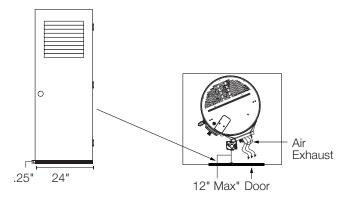

**Heater: Ducted With Inlet** and Outlet Duct Room size: Any size room

Requirements: No additional ventilation needed

#### **Notice**

If air temperature in installed location drops more than 15°F (8°C) during heating, air circulation is insufficient for efficient operation. Utilize ducting to direct cold exhaust air to another location

For optimal operation, installation in gray US map zone is recommended. When choosing the proper water heater, consult your local plumbing contractor.

### **Heater: Not Ducted**

Room size: Small Closet

Requirements:

- Air gap under door equals to 18 in<sup>2</sup> (0.75" clearance).
- Louver must be located the same height on door as the air exhaust on heater.
- Heater air exhaust must be positioned towards louver within one foot of door.
