

Installation Manual

Alcove Sliding Shower Door

Applicable Model: RX-SD08-4875CH, RX-SD08-4875MB,
RX-SD08-6076CH, RX-SD08-6076MB

INDEX

1. Installation Preparation	P01-03
2. Installation Instruction	P04-08
3. Maintenance	P09

SAFETY INFORMATION CAUTION:

Please carefully read the following important safety information before handling or installing this shower door. There are risks of serious injury while handling this product. To minimize these risks. Please note:

- * Always wear safety glasses and gloves while handling.
- * Always follow the installation instructions.
- * Do NOT cut or modify the tempered glass as it will shatter if cut.
- * Inspect glass for damage before installation.
- * Make sure to have a gaskets(we offered) in either side of the glass door, to make sure the metal is not touching the tempered glass.
- * Extreme caution should be taken while handling the glass during installation as the tempered glass may shatter if in contact with a hard surface.
- * Carefully remove product from packaging and keep packaging until installations complete.
- * Inspect all parts for damage or missing; if there is any damage or part missing to the unit prior to installation, please contact customer service.
- * Cover the drain with tape to prevent the loss of small parts. The shower base and finished walls should be installed before beginning the shower door installation.
- * During the installation, protect the shower floor with a drop cloth to avoid damage.
- * This product should be installed by two people who are familiar with construction requirements. Professional installation is recommended.

NOTE: Two professional people should perform this installation.

Suggest to keep this installation for future reference.

 **Screw ST4*30** x6

 **Cover of Top rail** x2

 **Particles** x6

 **Screw ST4*16** x6

 **Anti-collision rubber mat** x6
(With Decorative cover)

 **Pulleys** x4
(with Decorative cover)

1.Wall jamb	x 2.	4. Handle	x 2
2.Top rail	x 1	5.Bottom rail	x 1 (including 3 Sliders)
3.Glass door	x 2	6.Groundmass	(Purchased separately)

Attention Please:

Our product supports an adjustment within 4"width (Whether 60" or 48")
(for example: if you bought 60" width, then support any size of 56-60")

You only need to cut off the Top rail and Bottom rail accordingly.

(for example: the standard is 60", your width of shower room is 58", then directly cut off the Top rail and Bottom rail by 2")

*****Take out the Sliders which fixed on the Bottom rail before if cutting*****

Installation procedure One:

1. Check the groundmass for installation position, to keep level. (Figure A)

2. Put the **Bottom rail** on the groundmass. (Figure B)

You can also install on the floor tile or other flat position, if you do not install on the groundmass.

(Figure A)

(Figure B)

Installation procedure Two:

1.Put the 2 **Wall jambs** to the installation position, draw the drill hole position, keep the framework of the vertical level. (Figure C)

*Make sure the **Wall jambs** is covered over the **Bottom rail**, to keep the **Bottom rail** fixed*

2.Drill with the Impact drilling, and then put **Particules**. (Figure D)

3.Place your **Wall jambs** on the installation position, alignment hole. Fix the **Wall jambs** tightly with 6 **Screw ST4*30**. (Figure E)

4. Fix the **Anti-collision rubber mat** tightly on the **Wall jambs** with short screws with 6 **Screw ST4*16**. (Figure F)

Locked in the smaller hole in the Wall jambs

Usage and Maintenance

I. How to use and maintain the pulley of shower room

1.Avoid colliding the shower room active door energetically, to avoid activity door falling off; When the pulley does not turn or activity door does not move, the pulley needs replacing, it can't be energetically pushed or pulled, so as not to crush the glass loss.

2.Regularly clean slippery course, pulley of the shower room, fill lubricant (lubricating oil and lubricating wax);

3.When active door of the shower room is closed, there is seam above or below:

4.Check whether verticality deviation occurs, if any, install and adjustment.

II. The maintenance of toughened glass of shower room

1.Don't use sharp blow or hit shower room glass surface, so as to avoid breakage;

2.Do not use corrosive liquid such as banana oil to wipe the glass shower room surface, so as not to damage the surface luster;

3.Don't use coarse material to wipe the glass surface of the shower room to avoid scratch.

4.The glass is cleaned with cotton cloth or soft cloth after being wetted.

III. The maintenance of the aluminum alloy frame of the shower room

Oxidation coloring products, (silver, silver, brushed silver surface coloring class): This kind of products is not easy to fade compared to electrostatic coating products, but the surface can neither be wiped with coarse material, the surface can't be depicted with sharp object. If the shower room aluminum surface besmirch, please use neutral detergent dissolved in water before cleaning.

IV. The maintenance of the hardware fittings

1.The cleaning of furniture hardware fittings, wet cloth is used to wipe or the wet cloth is dipped into neutral detergent or cleaner processing, finally water stains are dried.

2.When the surface has serious besmirch or scratches, fireworks burn, a sandpaper (2000) can be used to grind the surface, with a microfiber cloth to wipe.

3.Don't use sharp and hard goods to scrape the surface of metal accessories, to avoid contacting with the materials such as hydrochloric acid, salt, bittern.

4.Keep clean, there are water stains on the surface during use, wipe dry after use, keep the surface dry and cleaning regularly.

We sincerely wish you a wonderful experience !

Thank you!
