12 Selling Point of this smart toilets

Selling Point

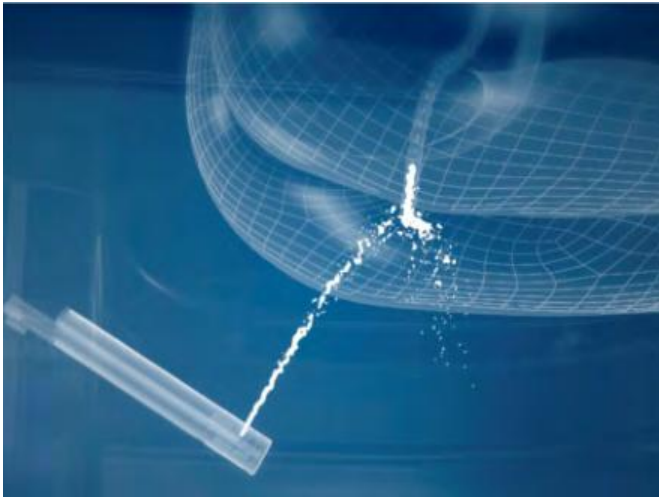

316 3 in 1 stainless steel nozzle :

316 stainless steel nozzles are better than most 314 stainless steel nozzles on the market, because it had add the MO element, have better rust and acid resistance.

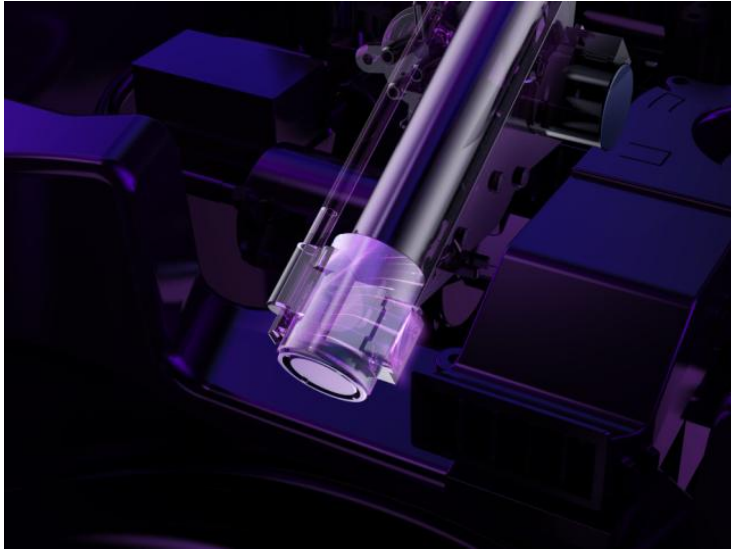

Stainless steel nozzle also looks much better than ABS nozzle in appearance

And inside of the nozzle, we also added the NANO silver ion in raw material to against bacterial.

Enema wash :

Our enema wash is reliaze by natural pressurization, it is helpful to relieve constipation, also it won't hurt customers skin.

UV sterilization :

UVC 275nm wavelength has the best compatibility above all the disinfection tech, effective to almost all the bacteria and virus.

High disinfect effect, 99%-99.9%

Auto disinfect 3 min after leaving for 15 sec, and 3min disinfection once every 4 hours

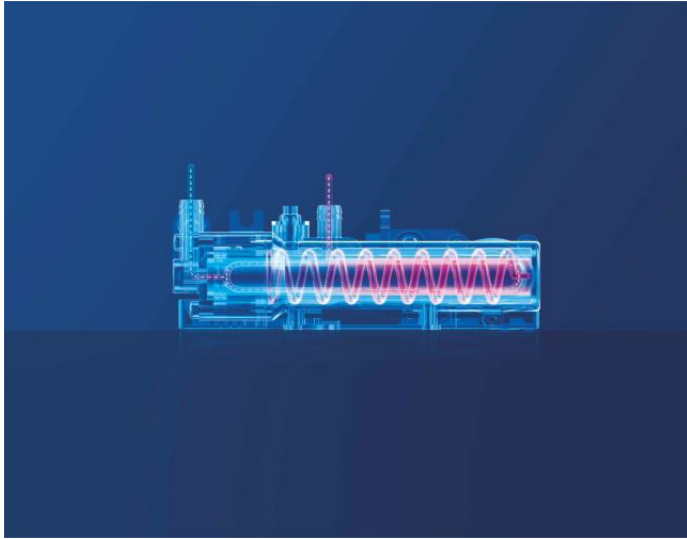

Aerated gentle wash :

It equipped patented aspirated wash nozzle, **mixes air with water** , makes water bubble into the waterspot, give more active oxygen to fresh water, the water is **softer and more delicate**.

with aerated bubble warm wash wash, enjoy your real spa journey

Selling Point

Ceramic core instant heater: double heater mode

Perform double heating based on the 5th generation heater . The diversion device surround the ceramic core heater, lengthen the heating path , water heated evenly . **15 to 39 degree only takes 1 sec, no need to wait or heat in advance any more, sure to make every drop of fresh water in same temp.** Adjust water temp as your wish, unlimited warm water cleansing, prevent bacterial breeding, safe and hygienic.

active oxygen deodorization tech:

advanced “active oxygen deodorization tech” , new chemical catalyst added, use the auto sterilization deodorant device , chemical reactions could be carried out, Releasing some oxygen, Create a fresh and natural bathroom environment.

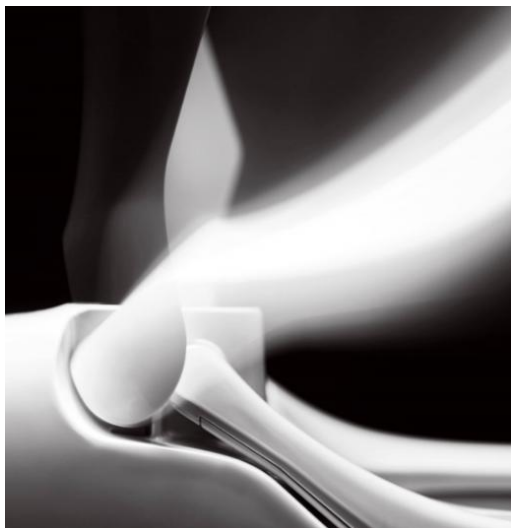

2.4G wireless remote control

using 2.4G wireless remote control rather than infrared remote control
, 2.4G wireless remote exclusive one to one code, Long distance, strong anti-interference, no dead angle

dial knob control

The purpose of the dial knob is to simplify the operation and make it easier for the olds to use the smart toilets. The dial knob makes the use of our smart toilet more convenient. Clockwise spin, female wash+auto flush+dry; anticlockwise spin, rear wash+auto flush+dry. More convenient to elders. One press to knob to full flush, double press to half flush, 70% water volume of the full flush, about 3.2L. providing different flush to different situations. In different states, the indicator light show different colors, same as breathing light. Rear wash, blue color; female wash, pink color; warm air dry, red color; flush, light red; standby mode, light pink, changing lightness, like breathing. Overall design is fashionable and with a sense of science and technology.

Microwave radar sensor

Within 80cm sector area, auto detect human actions, reduce misjudgment, enhance the sensitivity, free your hands, enjoy convenience.

Dry system

hidden air outlet:

hygienic and beautiful

moveable big air outlet, Japan imported motor:

large air flow, low noise, control the position and temp with remote.

advantages: assure the drying quality and area.

comfortable warm air:

4 levels temp adjustable: 35 °C 、 42 °C 、 48 °C 、 54°C, choose the one you like

Automatic and timing power saving:

When you leave for 1.5 minutes, the water temperature and seat temperature remain at a low temperature value, which reduces the power consumption by **30% compared to normal standby**.

After the power saving is turned on, the power consumption is **reduced by 99% compared with the usual standby**

Water saving toilet:

The product uses **4.2-4.8L water** for one-time flushing, which is fully in line with UPC standards, saving water and more eco-friendly.

Total power:

Rated power 1520W, maximum power 1680W, heating device 1600W, drying 200W, sitting circle 40W, standby power (remote control power off) 2W, saving 30W power

Power consumption of the whole machine:

An average of three people in a family 3 times/day, 9 times/day per day (power saving mode turned on), monthly electricity consumption is about **15 kW·h**

6 safety protection system
