

# Belfast Gate

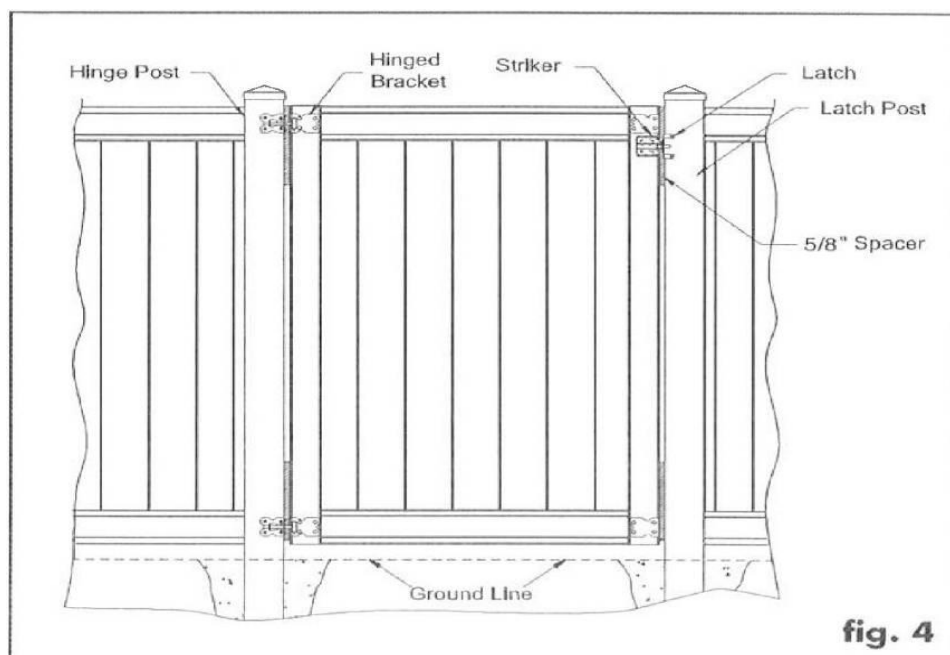

## Installation Guide

### Tools Required:

- Power drill with ¼" drill bit
- Circular saw with a fine-tooth blade or a hand saw used for cutting PVC
- 7/16" wrench
- Tape measure
- Pencil/marker
- Safety glasses

### Also Needed:

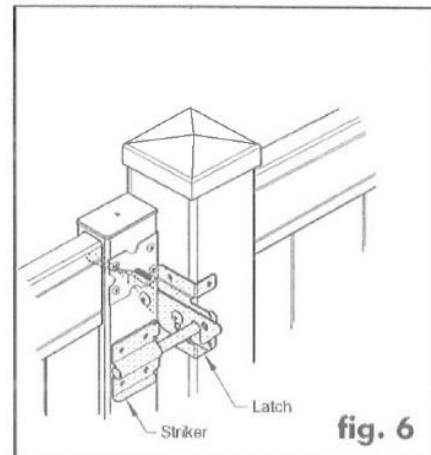

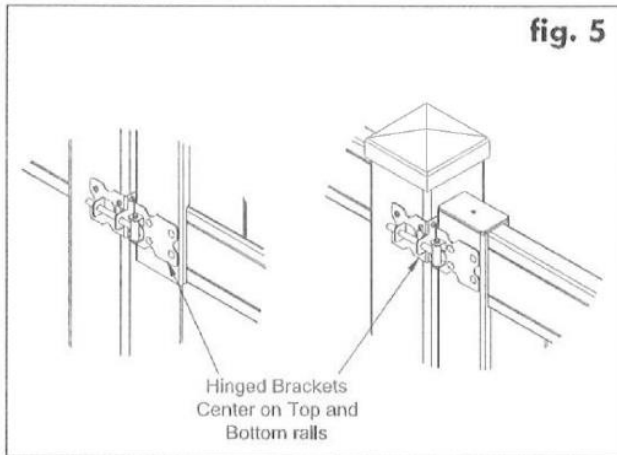

- 4 X 4 treated wood post for each post (sold separately)

### Installing Gate:

- Secure in place by clamping the jamb on the gate to the post
- Make sure the gate is level and square.
- Insert 4 X 4 treated wood post inside hinge side post then screw hinges directly through PVC Post and into 4x4. This will help strengthen the gate when swing open and closing
- Attach hinge brackets to the gate post with the included screws. (See Fig. 5)

- Height above ground level should be 2". Refer to Layout & Post Installation Figure 1.
- Remove any clamps when the gate is secure.
