

Vinyl Fence Gate Installation Guide

READ ALL INSTRUCTIONS CAREFULLY BEFORE BEGINNING THE INSTALLATION

Important: Contact your local authorities prior to digging any post holes to locate and identify possible buried utilities.

Prior to installation, it is the responsibility of the installer to meet all code and safety requirements, and to obtain all required building permits. Contact your local authorities regarding any local zoning laws, neighborhood associations and/or historic districts that may regulate size, type, placement, and ability of fencing. Ensure compliance before starting your fence installation. J. Sonic Services and its distributors shall not be held liable for improper or unsafe installations.

Tools and Materials (Not included)

- Tape Measure
- Power Drill
- PVC Glue
- Safety Glasses

Sloped Fencing

Note that this style of fencing is designed to be installed on a level surface. It is not designed to be angled to follow slopes.

Installing Aluminum post with Vinyl Gate.

Determine if the gate will be installed on an existing foundation surface or in-ground.

For surface mount installation (existing foundation) use a 6' (190 cm) heavy duty gate post and heavy-duty post base. Follow the steps in the fence guide for the base and post installation.

For in-ground installations (NO existing foundation), use an 8' (244 cm) heavy duty gate post. Follow the steps in the fence guide for the post installation. Let the concrete dry completely before installing the gate.

Attach the bottom rail using the hinges to secure onto one gate post.

Install the vinyl panels sliding them one at a time and fitting them into the post channel with the tongue facing away from the post.

Install the top rail, carefully securing in the vinyl panels using the hinge to secure rail to the gate.

Install Vinyl Aluminum Gate

Install the gate posts in the same method as installing the standard vinyl fence posts.

Attach the bottom rail using the hinges to secure onto one gate post.

Install the vinyl panels sliding them one at a time and fitting them into the post channel with the tongue facing away from the post.

Install the top rail, carefully securing in the vinyl panels using the hinge to secure rail to the gate.

Using the PVC glue secure the cap to complete the gate post.

Gate Latch and Handle

Attach the latch striker bar to the gate, on the swinging side of the gate.

Attach the latch catch to the post where the post meets the latch bar once the gate is closed.

Attach the handle on the exterior of the gate frame, not on the panel board, with screws.
