

### **GENERAL INSTRUCTIONS**

## **Drawer member**

- Step 1: Separate slide members by depressing the lever release.
- Step 2: Locate the screw holes on drawer 1-5/8" (min.) below the underside of the desk top of bracket at its lowest position.
- NOTE: Mounting bracket adjusts vertically in 7/16" increments. (Figure 2)
- Step 3: Position the front of the slide member 1/8" behind the drawer front. Install drawer member to drawer through vertical mounting slots. Secure with #8 pan head screws. (Figure 1)

#### **Cabinet member**

- Step 1: Attach brackets to slide at desired height and position (inboard /outboard) using self-taping screws. Cabinet member to be mounted parallel to drawer sides.
- Step 2: Position slide so the front of the cabinet member is 1/8" behind the drawer front when the drawer is in the closed position.
- Step 3: Locate screw holes for mounting brackets on the underside of desk top (or equivalent mounting surface). See column "A" on chart for this dimension.

# A. FOR BRACKETS FACING OUT

Use the width of the drawer plus 2-1/32" for bracket screw hole centers. (Figure 2)

## B. FOR BRACKETS FACING IN

Use the width of the drawer minus 1/8" for bracket screw hole centers. (Figure 3)

NOTE: Tighten screws on one side, then open and close (cycle) drawer a few times to be certain the slides have self adjusted to a parallel movement and are moving freely. Tighten screws on the other side of the drawer.

Step 4: Adjust height of drawer and install remaining screws in moving member.
